Great results without the effort

Toning Curves User Guide

The Toning Curves from www.1clickactions.com offer a quick and simple way to add tints and tones to your BW images. To start copy the Curve files from the archive into a convenient location on your hard drive.

Open your image in Photoshop and convert to Black and White using the method of your choice. Then click the Add Adjustment layer icon in the layers palette and select Curves from the menu.
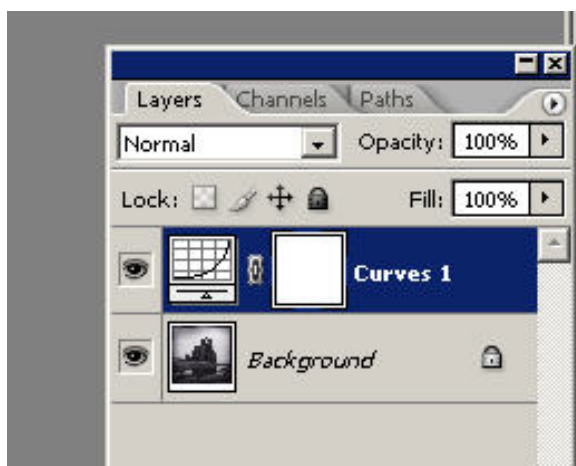

Click on "Load" in the dialog box.

Navigate to the folder where you copied the Crurve files and select one of the ".acv" files.

Click OK in the Curves dialog box to apply the curve to your image.

You can vary the strength of the toning effect by changing the opacity of the curves adjustment layer
